**Subject:** HAPs Rule and harmonized tox guidelines

Mr. Leukroth -

The 2/28/97 notice extending the comment deadline on the proposed HAPs rule (62 FR 9142) mentions that the reason for the extension is to allow finalization of the OPPTS harmonized toxicology guidelines that were reviewed by the SAP last fall. We have heard rumors that certain of those guidelines would be published in (final?) revised form very shortly. My inquiry to Amy Rispin in the Office of Pesticide Programs, referred me to you folks in OPPTS, who have "the big picture."

Can you tell me when those revised guidelines will be published or made available?

Ray S. McAllister, Director of Regulatory Affairs  
American Crop Protection Association
